
Microgreens Harvester

The Harvester is capable of cutting 10-15 trays per minute. It is efficient without causing any damage to the produce. The conveyor belts are designed with variable speed for optimum cutting.

Microgreens Dryer

The dryer is designed to dry your produce in a continuous motion, from start to finish is approx. 3-4 minutes drying time. The dryer is equipped with a variable speed conveyor for optimum control.

Microgreens Washer

The washer gently washes your produce in a conveyer style. Air and speed have fully adjustable flow controls. Conveyor discharge for easy removable

Hamill APS

Thank you for your interest in our Microgreens equipment. We have designed this equipment with the customers in mind. Each piece of equipment is made in house at our shop located in Niagara Falls, On. Canada. They can work independently or as one complete production line. We wanted the equipment to be low maintenance and stress-free. That is exactly what we did. Each piece of equipment comes in a crate and is ready to plug in and go upon arrival. All belting is food grade, full wash-down capabilities and built to last.
